## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1 and 6 are objected to because of the following informalities: claim 1: there is no claim antecedent for "the upper end", claim 6: there is no claim antecedent for "said sponge-like material". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Andreu (U.S. 6,018,837). Andreu discloses the invention as claimed. Andreu teaches a glove 10 for use in washing dishes or the like, the glove comprising a palm region 21 and a plurality of finger-receiving sections 23 and thumb receiving section 24 extending therefrom, a water-absorbent material 40 affixed to the palm region, and an abrasive material 30 affixed to the upper end of each of finger receiving sections and thumb section. The water-absorbent material is a sponge material and is removably attached to the palm region in that the material may be removed from the glove at the discretion of the wearer. It is noted that the claims do not recite specific glove structure (i.e. fastening means) which facilitates this removable relationship.

***Conclusion***

4. The prior art made of record on the attached PTO-892, and not relied upon, is considered pertinent to applicant's disclosure.
